

2024 Community Health Needs Assessment

An assessment of Clinton, Madison and Bond counties in Illinois conducted jointly by HSHS St. Joseph's Hospital in Breese, HSHS St. Joseph's Hospital in Highland, HSHS Holy Family Hospital in Greenville and the Bond County Health Department.

Needs Identified in the FY2022 - FY2024 CHNA	

Executive Summary

Background

Provisions in the 2010 Patient Protection and Affordable Care Act (ACA) require charitable hospitals to conduct a triennial community health needs assessment (CHNA) and accompanying implementation plan to address the identified needs. The CHNA asks the community to identify and analyze community health needs, as well as community assets and resources to plan and act upon priority community health needs. This process results in a CHNA report which is used to develop implementation strategies based on the evidence, assets and resources identified in the CHNA process.

Triennially, HSHS St. Joseph's Hospital Highland conducts a CHNA, adopts an implementation plan by an authorized body of the hospital and makes the report widely available to the public. The hospital's previous CHNA report and implementation plan was conducted and adopted in FY2021.

In FY2024 (July 1, 2023, through June 30, 2024), St. Joseph's Hospital Highland conducted a collaborative CHNA in partnership with St. Joseph's Hospital Breese, Holy Family Hospital in Greenville and Bond County Health Department. Upon completion, the hospital developed a set of implementation strategies and adopted an implementation plan to address priority community health needs. The population of Clinton, Bond and Madison counties were assessed.

Data collected was supplemented with:

- Community gaps analysis review.
- · Community assets review.
- Qualitative data gathered through a CHNA core group.
- Qualitative data reviewed by a community advisory council (CAC) with broad community representation.
- Surveys, including input from area health and social service providers, as well as community members who identify with the needs addressed.
- Local leader input.
- Internal advisory council.

Identification and Prioritization of Needs

As part of the identification and prioritization of health needs, the CHNA core group identified six health focus area from extant data sources. A pre-determined set of criteria (Diagram One: Defined Criteria for Community Health Needs Assessment) was used to narrow the health focus areas.

Diagram One: Defined Criteria for Community Health Needs Assessment

Feasibility Magnitude Seriousness Consider the number of people The severity of the issue Ability to have a measurable impacted by the issue area, or area or whether this is a impact. Availability of is this a trending health concern root cause of other resources and evidence-based for the community? health concerns. interventions. **Potential to Collaborate Equity** Importance of issue area Greatest impact on: Marginalized. to community and their • Vulnerable. willingness to address it • Populations living in poverty. in collaboriation.

HSHS Community Health identifies three guiding principles to achieving sustainable community health. Those principles are considered throughout each step in this process:

- 1. Health care is efficient and equitable.
- 2. Good health flourishes across geographic, demographic and social sectors.
- 3. Everyone has access to affordable, quality health care because it is essential to maintain or reclaim health. (See Appendix I: Community Health Principles).

The CHNA core group provided a thorough review of existing and supplemental data sets around the six identified health focus areas to the CAC. The CAC used a forced ranking exercise with the defined criteria listed in Diagram One to narrow the number of health focus areas. A survey was conducted to solicit community feedback on the issue areas. Upon survey closure, 85 responses were received and analyzed to further prioritize the needs based on community perceptions and experiences.

Results from the survey were then presented to the CHNA core group's respective internal advisory councils for further review and approval. St. Joseph's internal advisory council approved of the three priority areas recommended through the CAC and survey process. See Appendix II for a complete list of needs considered.

These were the top three health needs identified based on the defined criteria, survey results, stakeholder input from the CAC and internal input from St. Joseph's leaders.

- Access to mental and behavioral health services.
- Chronic conditions including food access and disease prevention and education.
- · Substance use disorder

Implementation Plan Development

As part of the engagement process with key stakeholders, attention was given to natural partnerships and collaborations that will be used to operationalize the implementation plan. The implementation plan is considered a "living document" - a set of strategies that can be adapted to the lessons learned while implementing community benefit activities and initiatives relevant to the priority needs. The broader set of community health needs will continue to be monitored for consideration as future focus areas.

Hospital Background

St. Joseph's Hospital Highland is a critical access hospital located in Madison County, Illinois. For more than 140 years, the hospital has been the leader in health and wellness in Madison County. St. Joseph's Hospital provides a wide range of specialties, including inpatient, surgical services, rehabilitation, emergency care and outpatient services such as medical imaging and laboratory.

St. Joseph's Hospital partners with other area organizations to address the health needs of the community, with a focus on the poor and vulnerable. The hospital is part of Hospital Sisters Health System (HSHS), a highly integrated health care delivery system serving more than 2.6 million people in rural and midsized communities in Illinois and Wisconsin. HSHS generates approximately \$2 billion in operating revenue with 13 hospitals and more than 200 physician practice sites. HSHS is committed to its mission "to reveal and embody Christ's healing love for all people through our high-quality Franciscan health care ministry." This mission is carried out by more than 11,000 colleagues and over 1,000 physicians who care for patients and their families in both states.

St. Joseph's Hospital has a rich and long tradition of addressing the health of the community. This flows directly from its Catholic identity. In addition to community health improvement services guided by the triennial CHNA process, the hospital contributes to other needs through its broader community benefit program including health professions education, subsidized health services, research and community building activities. In FY2023, the hospital's community benefit contributions totaled more than \$1 million.

- American Association of Cardiovascular and Pulmonary Rehabilitation (AACVPR) Cardiac Rehab Certification – 2021
- College of American Pathology Laboratory Accreditation 2021
- The Joint Commission Primary Stroke Center Certification 2021

Community Served by the Hospital

Although St. Joseph's Hospital Highland serves portions of southeast Madison County, southwest Bond County, northwest Clinton County and beyond, for the purposes of the CHNA, the hospital defined its primary service area as Madison County. The hospital's patient population includes all who receive care without regard to insurance coverage or eligibility for assistance.

Demographic Profile of Madison County

Characteristics	Illinois	Madison 2022	Madison 2019	%Change for County
Total Population	12,812,508	263,864	262,966	0.34%
Median Age (years)	38.3	40.2	41.1	-2.24%
Age				
Under 5 years	5.6	5.1	5.7	-11.76%
Under 18 years	22.1	21.0	21.7	-3.33%
65 years and over	16.6	18.7	17.6	5.88%
Gender				
Female	50.6	51.0	51.3	-0.59%

Percent below poverty in the last 12 months	11.9	12.3	10.9	11.38%
High School graduate or higher, percent of persons age 25+	90.1	93.3	91.96	1.44%

Process and Methods Used to Conduct the Assessment

St. Joseph's Hospital Highland collaborated in the planning, implementation and completion of the CHNA in partnership with St. Joseph's Hospital Breese, Holy Family Hospital in Greenville, and the Bond County Health Department.

Internal

St. Joseph's Hospital undertook an eight-month planning and implementation effort to develop the CHNA, identify and prioritize community health needs for its service area and formulate an implementation plan to guide ongoing population health initiatives with like-missioned partners and collaborators. These planning and development activities included the following internal and external steps:

- 1. Identified the CHNA core group comprised of St. Joseph's Hospital Breese, St. Joseph's Hospital Highland, Holy Family Hospital in Greenville, and the Bond County Health Department.
- 2. Convened a CAC to solicit input and help narrow identified priorities.
- 3. Conducted a community survey to get input from community members around the priorities identified.
- 4. Convened an internal advisory committee respective to each organization to force rank the final priorities and select the FY2025-FY2027 CHNA priorities.

External

St. Joseph's Hospital worked with core group partners to leverage existing relationships and provide diverse input for a comprehensive review and analysis of community health needs in Bond, Clinton, and Madison counties.

Representation on the CAC was sought from health and social service organizations that:

- 1. Serve low-income populations.
- 2. Serve at-risk populations.
- 3. Serve minority members of the community.
- 4. Represent the general community.

The following community stakeholders were invited to serve on the CAC:

- Age Smart*
- BCMW Community Services*
- · Birth to Five*
- Bond County Community Unit School District 2
- Bond County Health Department*
- Catholic Diocese of Belleville
- Chestnut Health Systems*
- · City of Breese
- · City of Greenville
- City of Highland
- Greenville First Christian Church
- HSHS Holy Family Hospital Greenville*
- HSHS St. Joseph's Hospital Breese*
- HSHS St. Joseph's Hospital Highland*
- Madison County Health Department*
- MERS Goodwill*
- Regional Office of Education #13

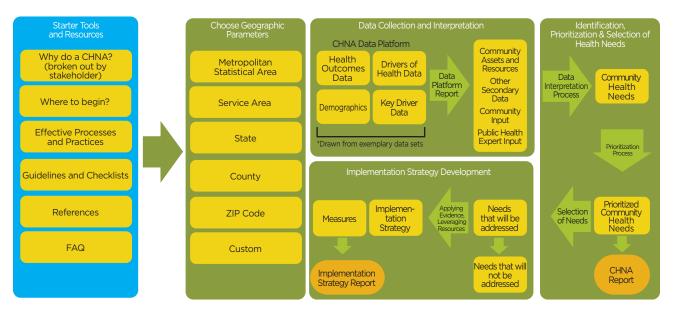

Defining the Purpose and Scope

The purpose of the CHNA was to:

- 1. Evaluate current health needs of the hospital's service area.
- 2. Identify resources and assets available to support initiatives to address the health priorities identified.
- 3. Develop an implementation plan to organize and help coordinate collaborative efforts impacting the identified health priorities.
- 4. Establish a system to track, report and evaluate efforts that will impact identified population health issues on an ongoing basis.

Data Collection and Analysis

The overarching framework used to guide the CHNA planning and implementation process is based on the Catholic Health Association's (CHA) Community Commons CHNA flow chart below:

Data Sources

The CHNA process utilizes both primary data including hospital data, focus groups and key stakeholder meetings as well secondary data. Secondary data sources include Behavioral Risk Factor Surveillance System (BRFSS), the U.S. Census Bureau, and Centers for Disease Control and Prevention (CDC) data sources. In addition, this data was supplemented with data from:

- Advisory Board 2023
- U.S. Census 2021
- U.S. Census 2020
- U.S. Census Bureau Quick Facts 2017-2021; 2022 Estimates
- Data USA
- Illinois Board of Education Illinois Report Card 2022-2023
- County Health Rankings 2023
- · Kids Count Data Center 2021
- · United for ALICE
- · Feeding America

- COMPdata: Bond County Patients Discharged
- COMPdata: Clinton County Patients Discharged
- COMPdata: Madison County Patients Discharged
- Illinois Department of Public Health (IDPH) 2021 Data
- Illinois Department of Public Health (IDPH) 2016-2020 Data
- Illinois County Behavior Risk Survey (2015 2019)
- County Health Rankings and Roadmaps 2023
- Best Neighborhoods
- Bond County Health Department 2024
- IDPH Opioid Data Dashboard 2022
- Illinois Public Health Community Map
- IEMA Public Radon Dashboard

The data was gathered into a written report/presentation and shared with community members through surveys and virtual key stakeholder meetings as described below. The data shared generated dialogue and discussion among the community leaders. As part of the discussion, they were asked to rank the identified need as well as the ability to collaborate to meet the health need.

Input from Persons Who Represent the Broad Interests of the Community

St. Joseph's Hospital is committed to address community health needs in collaboration with local organizations and other area health care institutions. In response to the FY2O21 CHNA, the hospital planned, implemented and evaluated implementation strategies to address the top three identified community health needs: mental and behavioral health services, chronic conditions, and workforce development. This year's assessment sought input from a broad cross section of community stakeholders with the goal of reaching consensus on priorities to mutually focus human, material and financial resources.

Input from Community Stakeholders

The CAC was used as the primary stakeholder group to review and force rank data. During a 90-minute virtual meeting, community stakeholders were asked to review data presented and provide additional sources for priority areas not listed. The CAC also helped identify community assets and gaps which were weighed when considering the magnitude and feasibility of the priority areas.

The core group developed and circulated a community survey (Appendix IV) to solicit first-person feed-back on the health issue areas. In March 2024, 85 individuals completed the survey. The core group analyzed and presented the results (Appendix V) to internal teams. The results were used to guide further discussion around final priority selection.

More information on survey analysis will be documented in the CHIP to be completed and approved by November 15, 2024.

Input from Members of Medically Underserved, Low Income and Minority Populations

The CHNA process must be informed by input from the poor and vulnerable populations served by HSHS and St. Joseph's Hospital. To ensure the needs of these groups were adequately represented, the CHNA process included representatives from such organizations as noted above. These organizations serve the under-resourced in the community, including low-income seniors, children living in poverty and families who struggle with shelter and food insecurity. Representatives of these organizations have extensive

knowledge and quantifiable data regarding the needs of their service populations. Actively including these organizations in the CHNA process was critical to ensure that the needs of the most vulnerable persons in the community were addressed in the CHNA process and during development of related implementation strategies.

Input on FY2021 CHNA

No written comments were received regarding the FY2021 CHNA.

Prioritizing Significant Health Needs

Members of St. Joseph's Hospital's administration team collaborated with key department leaders in the review and analysis of CHNA data.

As part of the identification and prioritization of health needs, the hospital considered the estimated feasibility and effectiveness of possible interventions by the hospital to impact these health priorities; the burden, scope, severity or urgency of the health need; the health disparities associated with the health needs; the importance the community places on addressing the health need; and other community assets and resources that could be leveraged through strategic collaboration in the hospital's service area to address the health need.

Based on the CHNA planning and development process described, the following community health needs were identified:

- 1. Mental and behavioral health
- 2. Chronic conditions
- 3. Substance use disorder

As an outcome of the prioritization process, the following community health needs were also identified but will not be addressed directly by the hospital for reasons indicated:

- Affordable housing: While not a direct priority issue, affordable housing challenges and barriers will be explored within the strategic plan of workforce barriers.
- Diabetes and obesity: While not a direct priority issue, diabetes and obesity eating will be addressed within chronic disease education and prevention strategies.
- Food insecurity: While not a direct priority issue, these barriers for health are incorporated in all strategic planning.
- Maternal health and child health: St. Joseph's is not focusing on this need as part of the CHNA. St. Joseph's
 Hospital Highland offers prenatal support in partnership with its sister hospital St. Joseph's Hospital Breese,
 in addition to providing comprehensive women's services. With a comprehensive line of women's imaging,
 surgical services and cardiovascular care programs, among other services, St. Joseph's Hospital Highland has
 spent years helping women manage and maintain their health in a variety of crucial ways.
- Nutrition and healthy eating (access and knowledge): While not a direct priority issue, nutrition and healthy
 eating will be addressed within chronic disease education and prevention strategies.
- Oral health: St. Joseph's Hospital will work closely with the surrounding county health departments to raise awareness and provide patient referrals for dental services.
- Transportation: While not a top priority, the transportation strategies developed will assist in further preparing individuals for employment.

The following quality of life results gleaned through the Sangamon County Citizen's Survey conducted in 2021 reveal that participants reporting "mental health was not good" has been increasing.

Overview of Priorities

Mental Health and Behavioral Health Services

Individuals living in St. Joseph's service area have less access to mental health care providers. While it's difficult to measure the rate of individuals in the service area suffering from mental illness, there is some data available that can aid in assessing the need. When looking at the BRFSS question which asks the number of days that mental health is not good for respondents, the rate for Madison County of those who report frequent mental distress is an average of 13%.

The U.S. Health Resources & Services Administration (HRSA) classifies Madison County as a health professional shortage area for mental health providers. The chart below compares the number of providers per residents for the county and the state. While the ratio has improved (up from 640:1 in 2018), significant work still needs to be done to ensure Madison County residents have timely access to mental health services.

Report Area	Ratio of Population to Mental Health Providers
Madison County	460:1
Illinois	390:1

Source: Health Professional Shortage Area: https://data.hrsa.gov/tools/shortage-area/hpsa-find

Chronic Conditions - including food access and disease prevention and education

According to the County Health Rankings, Madison County is ranked in the lower middle range of counties in Illinois (lower 25% - 50%). Unhealthy lifestyle choices and lack of disease awareness, prevention and management lead to poor health outcomes in a community. Among the leading causes of death for residents of Madison County are heart disease, stroke and cancer. These may be preventable with timely access to health care and lifestyle modification. There is a higher incidence of adult smoking, adult obesity, physical inactivity, limited access to exercise and excessive drinking in Madison County as compared to the state.

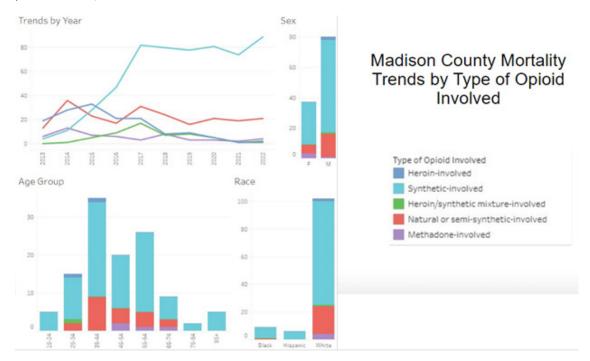

Health Behavior	Madison County	Illinois
Smoking	18%	13%
Obesity	40%	303%
Physical inactivity	23%	24%
Access to exercise	87%	90%
Excessive drinking	18%	15%
Alcohol-impaired driving deaths	33%	29%
Sexually transmitted infections	452.9	542.3

Source: County Health Rankings

St. Joseph's Hospital has a self-management diabetes education program. The hospital's diabetes education team is committed to helping individuals understand and manage their diabetes through medication, exercise and diet.

Substance Use Disorder

Data available through the Illinois Department of Public Health Opioid Data Dashboard provides an overview of mortality trends by type of opioid. In 2022, just under 120 deaths were reported due to overdose. According to the Opioid Dashboard, the majority of Madison County opioid deaths were related to synthetic-involved (fentanyl, carfentanil) and natural or semi-synthetic-involved (morphine, codeine, oxycodone, hydrocodone – i.e., pain relievers).

Source: Illinois Department of Public Health Opioid Data Dashboard, 2022: https://idph.illinois.gov/OpioidDataDashboard/

When compared to the state of Illinois, Madison County has a younger population impacted by drug use leading to hospitalization. The majority of cases in Illinois are ages 45 and above.

Survey respondents had the following suggestions for how health care could improve around substance use disorder:

- Have more schools interested in youth prevention education for substance use prevention.
- · Invest in local mental health and substance abuse treatment and recovery options.
- Increase local access to mental health and substance abuse, reduce the stigma with education and awareness for both of these.

Potential Resources to Address the Significant Health Needs

As part of the focus groups and key stakeholders' meetings, community assets and resources that currently support health or could be used to improve health were identified. The following resources will be considered to develop the implementation plan to address the prioritized community health needs:

Hospitals and related medical groups

There are four community hospitals within the St. Joseph's Hospital Highland service area, as well as other medical groups:

- HSHS St. Joseph's Hospital, Highland, Illinois
- HSHS St. Joseph's Hospital, Breese, Illinois
- HSHS Holy Family Hospital, Greenville, Illinois
- Anderson Hospital, Maryville, Illinois
- Highland Physicians
- HSHS Medical Group
- Prairie Cardiovascular Services
- Southern OB/Gyn Associates (SOGA)

Walk-in health clinics:

- HSHS Medical Group Family and Internal Medicine
- Anderson Express Care, Highland, Illinois

Community Organizations and Government Agencies:

- American Diabetes Association
- Area Churches
- Bond County Health Department
- Clinton County Health Department
- Highland Area Christian Services Ministry
- Highland Community School District
- Highland Police Department
- · Korte Recreation Center

- Madison County Health Department
- Madison County Transit
- Partnership for a Drug-Free Community
- Patient Innovation Center
- Patient Innovation Center
- Relevant Pregnancy Care Center
- St. Paul Catholic School

Next Steps

After completing the FY2024 CHNA process and identifying the top priority health needs, next steps include:

- Collaborating with community organizations and government agencies to develop or enhance existing implementation strategies.
- Developing a three-year implementation plan (FY2025-FY2027) to address priority health needs identified in the FY2024 CHNA process.
- Integrating the implementation plan into organizational strategic planning and budgeting to ensure alignment and allocation of human, material and financial resources.
- Presenting and receiving approval of the CHNA report and implementation plan by the hospital's governing board.
- Publicizing the CHNA report and implementation plan widely on the hospital website and CHNA partner websites and make accessible in public venues such as town halls, etc.

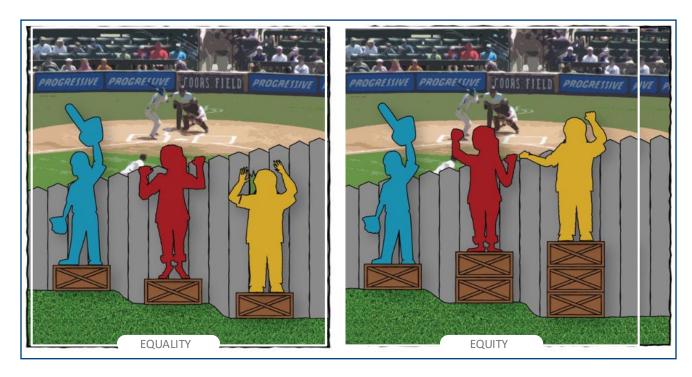

Approval

The FY2024 CHNA Report was adopted by the hospital's governing board on May 22, 2024.

APPENDIX I

Community Health Guiding Principles

Principle One: Health Care is Efficient and Equitable

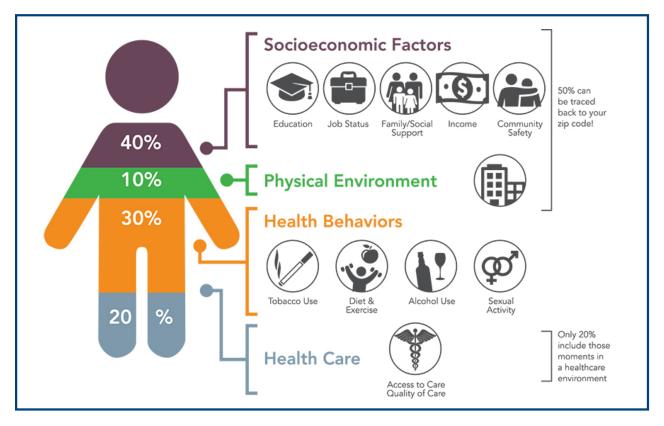

This graph challenges us to redefine our basic expectations for fairness and success as contingent upon those individual differences.

- Equality is treating everyone the same. It ignores our differences, and it ignores our unique needs.
- Equality can only work if everyone starts from the same place. Often, we are starting from different places and need resources allocated accordingly.
- Equality recognizes that fairness means equality — every person gets one box.

- Equity actively moves everyone closer to success by leveling the playing field.
- Equity recognizes not everyone starts at the same place, and not everyone has the same needs.
- Equity recognizes that fairness means each person has the same access based on resources needed.

Principle Two: Good health flourishes across geographic, demographic and social sectors

Good health flourishes when we acknowledge and address disparities that affect a wide range of health risks and outcomes

Socioeconomic factors:

Influence of financial resources on health including availability of services due to financial constraints. Service limitations include safe housing, nutritive food, exercise, socialization and more.

Healthy Behaviors:

- 1. May be influenced by socioeconomic factors and physical environment.
- 2. Indicator of health outcomes.
- 3. Consideration must be given to unhealthy behaviors as a coping mechanism of a past or current trauma.

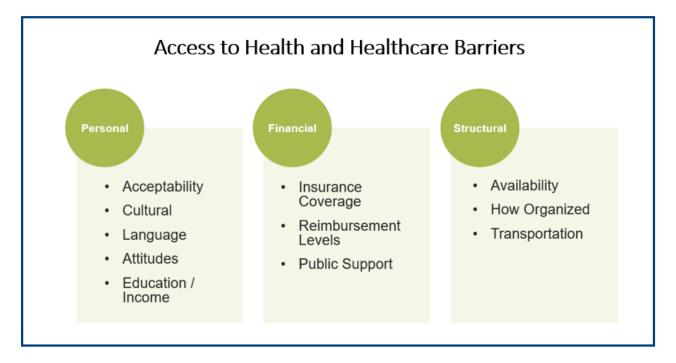

Neighborhood and Physical Environment:

- 1. Where someone lives impacts wellbeing.
- Robert Wood Johnson analysis of life expectancy by ZIP code found that where one lives is one of the leading predictors of life expectancy.

Health Care:

- 1. Note 20% (some RWJ studies indicate 10% 20%).
- 2. If our emphasis is on health care access, we are missing the opportunity for clinical and non-clinical community-based linkages to drive sustainable individual and population health improvement.

Principle Three: Everyone has access to affordable, quality health care because it is essential to maintain or reclaim health.

The reality is that health starts long before illness and even long before birth. The measurement of factors such as equity, health disparities, social determinants of health and cultural indicators can be used to support the advancement of health equity.

These principles show the foundation HSHS ministries use to progress toward more equitable communities while addressing the top needs identified through the triennial CHNA process.

APPENDIX II

2024 Madison County Community Health Needs Assessment

> Priorities Analyzed, Reviewed and Prioritized

Six original needs were identified by the core group using existing secondary data. The needs identified were:

- 1. Affordable housing.
- 2. Chronic conditions.
- 3. Mental/behavioral health.
- 4. Oral health.
- 5. Substance use disorder.
- 6. Transportation.

The core group presented the six needs to the CAC and led them through a forced ranking exercise. At that time, the CAC decided to keep all six priorities:

- 1. Affordable housing.
- 2. Chronic conditions.
- 3. Mental/behavioral health.
- 4. Oral health.
- 5. Substance use disorder.
- 6. Transportation.

The core group then solicited input from community members on the six priorities identified through the CHNA process. Following a survey analysis, each organization presented findings to their respective internal committees. St. Joseph's Hospital's internal committee approved the recommended priorities which were adopted by the board of directors as the FY2024 CHNA priorities:

- 1. Mental/behavioral health
- 2. Chronic conditions
- 3. Substance use disorder

APPENDIX III

2024 Madison County Community Health Needs Assessment

Community Advisory Committee Letter and Meeting Dates 1/29/2024

RE: Invitation: Bond, Clinton, and Madison County Community Advisory Council

To our valued Community Partners:

Your organization has been a pivotal part of our past community health initiatives, contributing significantly to the Bond, Clinton, and Madison County Health Needs Assessments conducted collaboratively by HSHS Holy Family Greenville, St. Joseph Breese, and St. Joseph's Highland; and Bond County Health Department. Given your valuable experience and insights, we would be honored to have your participation on the Community Advisory Council to help determine upcoming priority areas for the current assessment.

The Community Advisory Council is meeting virtually on February 14, 2024, from 2 PM to 3:30 PM. During this meeting, we will review existing data to highlight some of the most pressing health needs in Bond, Clinton, and Madison Counties. We will rely on your expertise to help us prioritize these areas at the end of the presentation.

Your feedback and contributions throughout this process are invaluable. We sincerely hope that you will consider participating once again in this important initiative. If your schedule does not permit your attendance, we kindly ask that you consider delegating this role to another leader within your organization.

Please respond to this e-mail to confirm your participation or to delegate your role. Additional details including meeting agenda, assessment timeline, and virtual meeting link will be included following your RSVP.

Thank you for your continued dedication to improving the health of our community. We look forward to working together on this significant project.

Sincerely,

Alex Schneider Community Health Outreach Specialist Hospital Sisters Health System

APPENDIX IV

2024 Madison County Community Health Needs Assessment Community Survey

This survey will take less than five minutes. Thank you for helping us find ways to create a healthier community. This survey is being conducted by HSHS Holy Family Hospital, HSHS St. Joseph's Hospital in Breese, and HSHS St. Joseph's Hospital in Highland.

1. In what year were you born? (enter 4-digit birth year; for example, 1976)					
2. Wha	at is your gender?

APPENDIX V

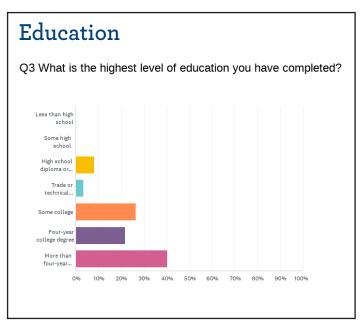

2024 Madison County Community Health Needs Assessment Community Survey Results The community survey returned 85 completed surveys. Diversity in respondents including disability status and income levels were favorable. More work needs to be done to hear from individuals under the age 45, individuals without college experience and our male population.

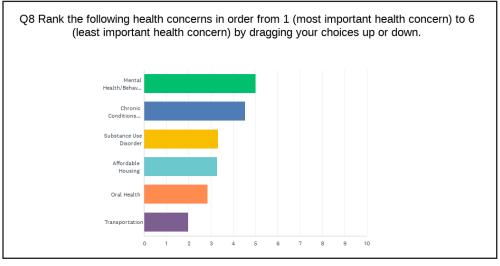

During the community health improvement plan (CHIP) process, additional feedback will be solicited from groups not represented, as well as more feedback overall, through focus groups. More information on the CHIP process, focus group identification and analysis will be included in the final plan.

Below is demographic data representing the survey respondents:

Gender: Female	82.76%
Gender: Male	17.24%
Gender: Prefer not to say	0%
White	98.85%
Living with a disability	4.6%

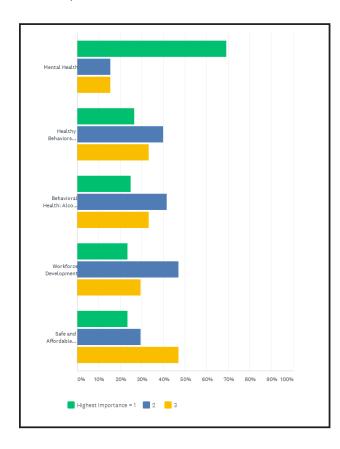

Participants were asked to rank the following health concerns in order from 1 (most important health concern) to 6 (least important health concern) by dragging choices up or down.

- 1. Mental Health/Behavioral Healthy 5.02
- 2. Chronic Conditions 4.54
- 3. Substance Use Disorder 3.32
- 4. Affordable Housing 3.28
- 5. Oral Health 2.85
- 6. Transportation 1.99

APPENDIX VI

Evaluation of the Impact of Strategies
Taken to Address Significant Health
Needs Identified in the
FY2022 - FY2024 CHNA

As part of the identification and prioritization of health needs, St. Joseph's Hospital Senior Leadership Team considered the estimated feasibility and effectiveness of possible interventions by the hospital to impact health priorities. Prioritization was based on scope, severity, and burden; health disparities associated with the need; the importance the community places on addressing the health need; the hospital and community assets and resources available to address the health need; and local expertise and input.

Based on the CHNA planning and development process described, the following priority community health needs were identified:

- 1. Mental and behavioral health
- 2. Chronic conditions
- 3. Workforce development

Implementation strategies established to address these needs through specific initiatives included:

Mental and Behavioral Health

Goal: Enhance access to comprehensive, high-quality mental and behavioral health services to improve community well-being and reduce health disparities.

Strategy 1: Improve access to prevention and early intervention services.

In FY2022, HSHS St. Joseph's Hospital partnered with the Gateway Foundation to offer prevention and early intervention services for patients with substance use disorders. Through this collaboration, an engagement specialist and a recovery coach screened patients, developed treatment plans, and assisted these patients in transitioning back to the community post-treatment. By FY2023, over 60 patients had benefited from these screening and referral services.

Strategy 2: Improve access to care.

St. Joseph's Hospital, along with three other hospitals in southern Illinois, engaged in an 18-month planning process to tackle crisis screening gaps in emergency departments. They implemented a strategy that included comprehensive 365-day psychiatric coverage for mental health crises. Furthermore, their ongoing commitment to providing transportation via the Friends Van ensured over 1,400 patients could access their essential medical appointments.

Strategy 3: Unified planning and policy efforts.

HSHS launched a Diversity, Equity, and Inclusion (DEI) committee in FY2022, with St. Joseph's Hospital actively contributing to the Workforce subcommittee. This initiative identified internal and external workforce gaps, such as those affecting readiness and obtainment, unifying planning and policy efforts to streamline health care provision. Additionally, St. Joseph's played a critical role in the Highland Area Meals on Wheels program, addressing broader health determinants by delivering over 17,000 meals to seniors in FY2022.

Chronic Disease

Goal: Reduce the incidence and impact of chronic disease by enhancing preventive care, education, and access to effective management resources.

Strategy 1: Improve access to prevention and early intervention services.

In FY2023, St. Joseph's Hospital delivered over 14,000 meals to seniors through the Highland Area Meals on Wheels program. By ensuring consistent delivery of these nutritious meals five days a week, the program plays a crucial role in preventing and managing chronic conditions, particularly for vulnerable elderly patients.

Strategy 2: Improve access to care.

The hospital made transportation a focal point in FY2023, providing more than 1,400 patients with essential transport services via the Friends Van. This initiative improves access to necessary medical, dental and personal appointments, helping those with chronic conditions receive consistent care.

Strategy 3: Unified planning and policy, and advocacy efforts.

St. Joseph's Hospital collaborated with neighboring hospitals to implement a unified plan addressing the needs of those with chronic conditions. This plan includes 365-day psychiatric coverage in the emergency department, ensuring seamless care and immediate response for patients facing chronic health challenges. By integrating comprehensive screening and treatment protocols, this initiative significantly enhances care coordination for patients with chronic diseases.

Workforce Development and Barriers

Strategy 1: Integrated programs, long-term goals with workers at the center.

HSHS St. Joseph's Hospital fulfilled this strategy with the launching of HSHS's Diversity, Equity, and Inclusion (DEI) committee in FY2022. By participating in the Workforce subcommittee, St. Joseph's explored gaps in workforce readiness and success. Their commitment to the long-term inclusion of workers was demonstrated through \$612,491 worth of mentoring and job-shadowing experiences. The hospital mentored 132 interns across health care fields such as nursing, pharmacy and radiology, emphasizing a worker-centric approach.

Strategy 2: Develop workforce plan and training programs.

St. Joseph's Hospital collaborated with local schools and colleges to train interns, providing hands-on experience in their respective fields. Their partnership with these institutions fostered a training program that prepared individuals for health care careers, contributing to the community's workforce development. This comprehensive training ensured that future health care workers gained practical skills, enhancing their employability.

Strategy 3: Unified planning and policy, and advocacy efforts.

Unified planning and policy efforts were achieved through the 18-month planning process that identified gaps in emergency department crisis screening. The hospital, alongside others in southern Illinois, devised a plan for 365-day psychiatric coverage. Additionally, they engaged with the Illinois Human Trafficking Task Force to raise awareness and respond to trafficking issues affecting workforce safety.
